Perisoft launches purpose-built Australian version of SAP Business All-in-One

Perisoft delivers a fast start ERP solution in six to eight weeks with fixed price, fixed scope

Sydney, Australia — 27 February, 2008 — In partnership with SAP Perisoft has launched a purpose-built Australian version of SAP Business All-in-One delivering fast start enterprise resource planning (ERP) for Australian midsize companies in six to eight weeks.

The Fast Start Program for SAP Business All-in-One delivers fixed price, fixed scope, on-premise ERP. The software comes pre-packaged with an IBM server.

The solution has been purpose built by SAP's SME Solution Centre for the Australian market and is designed to meet the needs of fast-growing enterprises in services, manufacturing and wholesale industry sectors.

The new offering was developed following extensive research on the aspirations of the Australian midsize companies showing a demand for SAP Best Practice-based solutions, configured to their needs and bundled with hardware, project accelerators and application configuration tools.

“Rapidly growing companies in Australia are faced with a dilemma: replace their business management systems and create a platform that supports continued growth or persevere with existing technologies and point solutions, despite their constraints and shortcomings,” said George Byrne, Director Business Development – Perisoft Global Services.

“This solution delivers a complete package that is ready to run in six to eight weeks. It increases predictability and improves the business case for change, helping organisations make a decision which will improve commercial performance and business flexibility for years to come.”

The Fast Start Program for SAP Business All-in-One is designed to provide a baseline for organisations wanting a solution to support key business processes critical to their success. The

solution fulfils local business requirements for Financial Accounting such as GST and provides a chart of accounts customised to Australian business needs. The package contains project accelerators such as data migration tools, which play a key role in reducing deployment times, and a proven, step-by-step, deployment process.

The Fast Start Program for SAP Business All-in-One is powered by SAP NetWeaver providing a foundation for organisations that want to add cross functional business capabilities such as human resources, customer relationship and supply chain management.
